Tied to Classroom Learning

The best preparation for the SAT Suite of Assessments is classroom learning. Working hard and engaging in challenging course work helps students build the knowledge they need to be successful on the tests and, in turn, ready for college and career training programs.

The Khan Academy practice program links to classroom learning and will guide students to:

- ▶ Focus on the knowledge and skills necessary for college and career readiness.
- ▶ Review any knowledge gaps demonstrated in their PSAT™ 8/9, PSAT/NMSQT, PSAT 10, or SAT performance.
- ▶ Practice within the most appropriate content areas.
- ▶ Build familiarity with the SAT format, question styles, and testing experience.

Developed with the Test Makers

The Khan Academy practice program is the only one of its kind developed in collaboration with the writers and developers of the SAT — it's the best available and it's free!
