

Student Learning Opportunities provide experiences that enhance and explore STEM topics. These experiences are even more important now than ever and help cultivate interest in STEM related fields.

STEM Student Learning Opportunities are a series of learning events and competitions open to FBISD students. Event information or necessary registration may be found on the appropriate websites listed within the events chart and you may also receive information from your campus. Please check sites regularly for updates and note that some events may have limited capacity. Information on events may also be shared through campus coding clubs, broadcasting clubs, and/or campus communications.
