

Classroom News

Week of May 5th thru 9th

Reading and Writing: Readers and writers will continue to work on their research projects creating powerpoint presentations showing their research and understanding of their chosen person. Students will prepare to present their research to their peers.

Math: Students will interpret and solve problems related to graphs. Identify real-world relationships using number pairs in a table and describe their relationship.

Social Studies: Students will identify how a business operates, and individuals in the past or present that have started a business.

Science: Students will investigate how environmental changes affect different organisms.
