Description

Switch to Light Mode

Students will first select a specialty of their choice. 1 specialty per student. Then, students will create a model presentation where they show how you are going to design your Office front desk space. Make sure to be specific for the Specialty in the office and include everything that you will need for your space with safety rules. Students will create a model and present it to the class. This lab grade is for both creating an office area and presenting it in class.

Upload the graded rubric and a pic of your model.
