Respondus LockDown Browser

LockDown Browser is a locked browser for taking tests in Schoology. It prevents you from printing, copying, going to another URL, or accessing other applications during a test. If a Schoology test requires that LockDown Browser be used, you will not be able to take the assessment with a standard web browser.

Taking a Test

1 | Close all programs, unless one is used to connect you to the Internet.

2 | Log into Schoology with a regular browser, select the course and navigate to the test.

3 | From this screen, either install LockDown Browser or launch it to take the quiz.

   A | If the computer already has LockDown Browser installed, simply click the “Start New Attempt” button.

   B | If the computer does not have LockDown Browser installed, this link will enable you to install LockDown Browser to the computer.

4 | If prompted to close a blocked program (e.g. screen capture, instant messaging), choose Yes.

5 | The test will then start. (Note, once a test has been started with LockDown Browser, you cannot exit the test until the Submit button is clicked.)

Browser Usage

LockDown Browser should only be used for taking Schoology tests. It should not be used in other areas of Schoology.

Problems?

If you have problems downloading, installing or taking an assessment with Respondus LockDown Browser please visit fortbendisd.com/lockdownbrowser or you can contact the FBISD support team at support.fortbendisd.com
