

Fort Bend ISD: Boundary Planning for Elementary 51

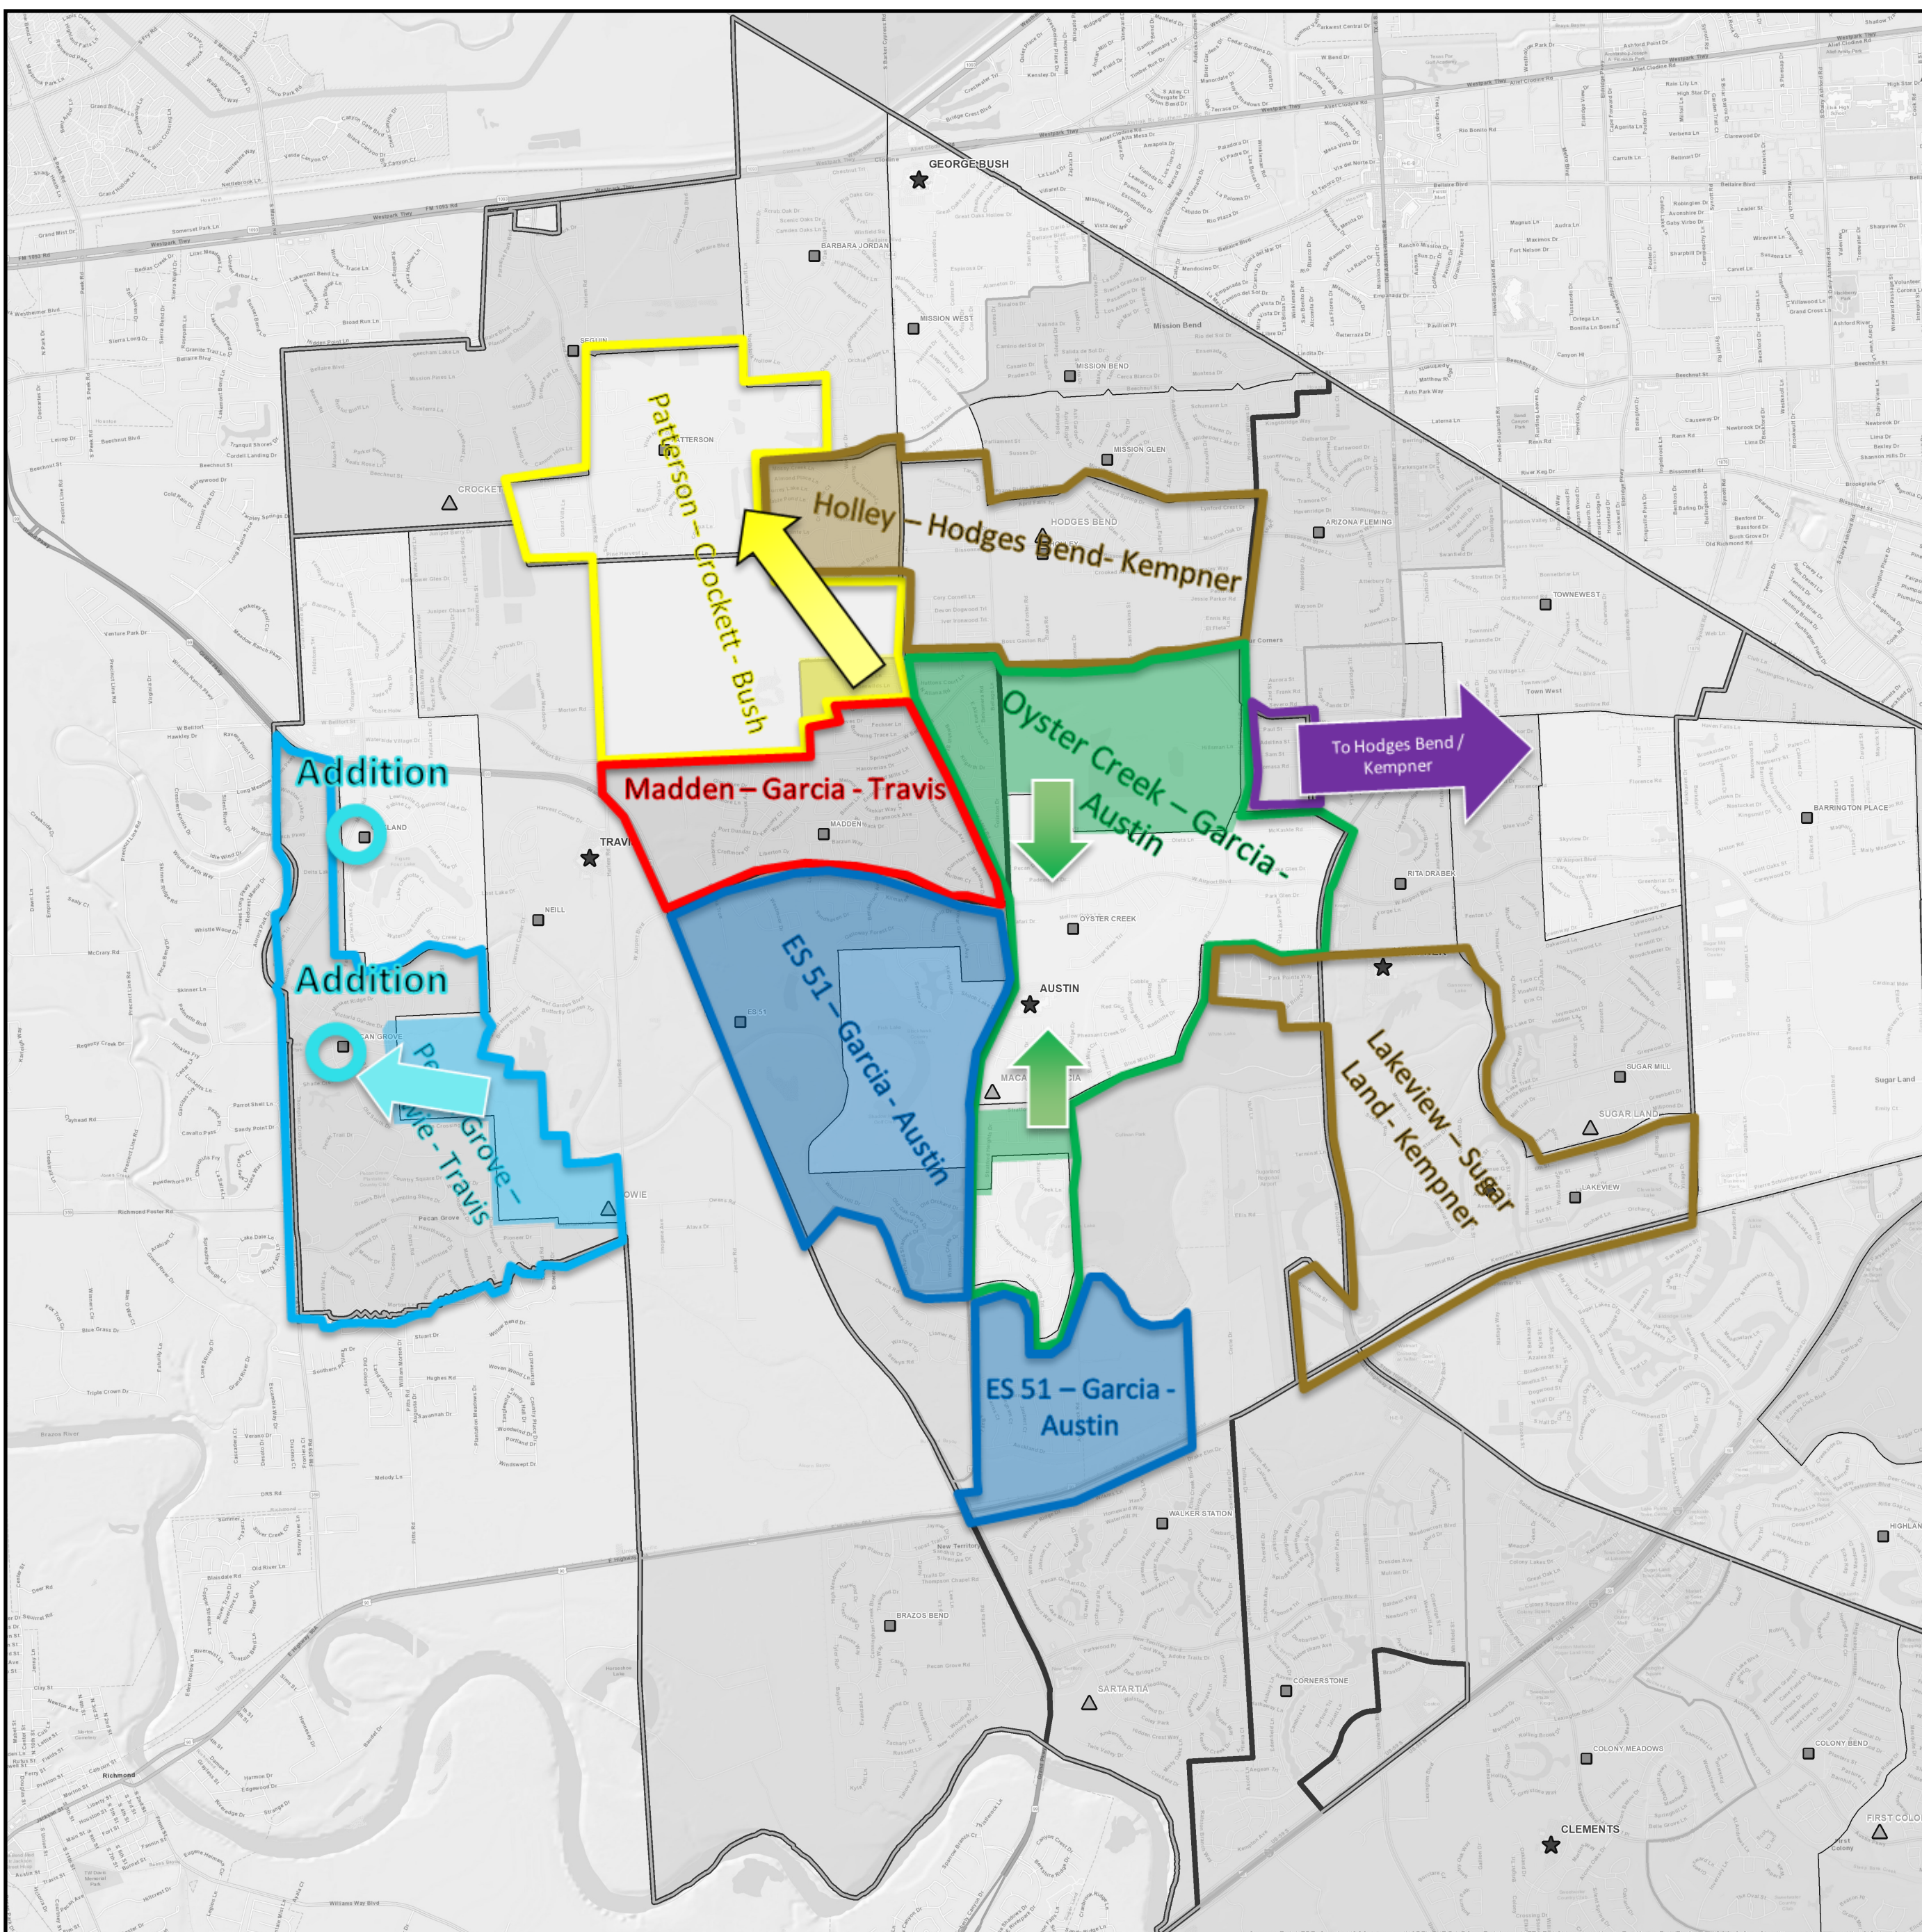

Current Boundaries

The map below illustrates the current boundaries for the northwest area of the district. The background shades of color denote the current elementary boundaries. The thick purple lines outline the high school boundaries. The medium orange lines outline the current middle school boundaries.

Proposed Changes

The map below illustrates the proposed changes to the elementary boundaries as well as any changes to feeder patterns. The proposed boundaries are outlined in bold colors and the areas that change elementary schools are highlighted in transparent shares the correspond to the proposed school.

Resulting Enrollment and Utilization

The tables below illustrate the resulting enrollment, utilization, and percent of economically disadvantaged students relative to this option. Utilization values are color coded to show utilizations over 100% of design capacity in pink or red, and utilizations under 80% in blue. Design capacities reflect the total capacity once all additions are complete. Capacities shaded in dark blue are currently funded, and capacities in light blue will require additions needing funding in a future bond program (unfunded additions show completion in the 2023-24 school year as a place-holder).

Fort Bend ISD: Boundary Planning for Elementary 51

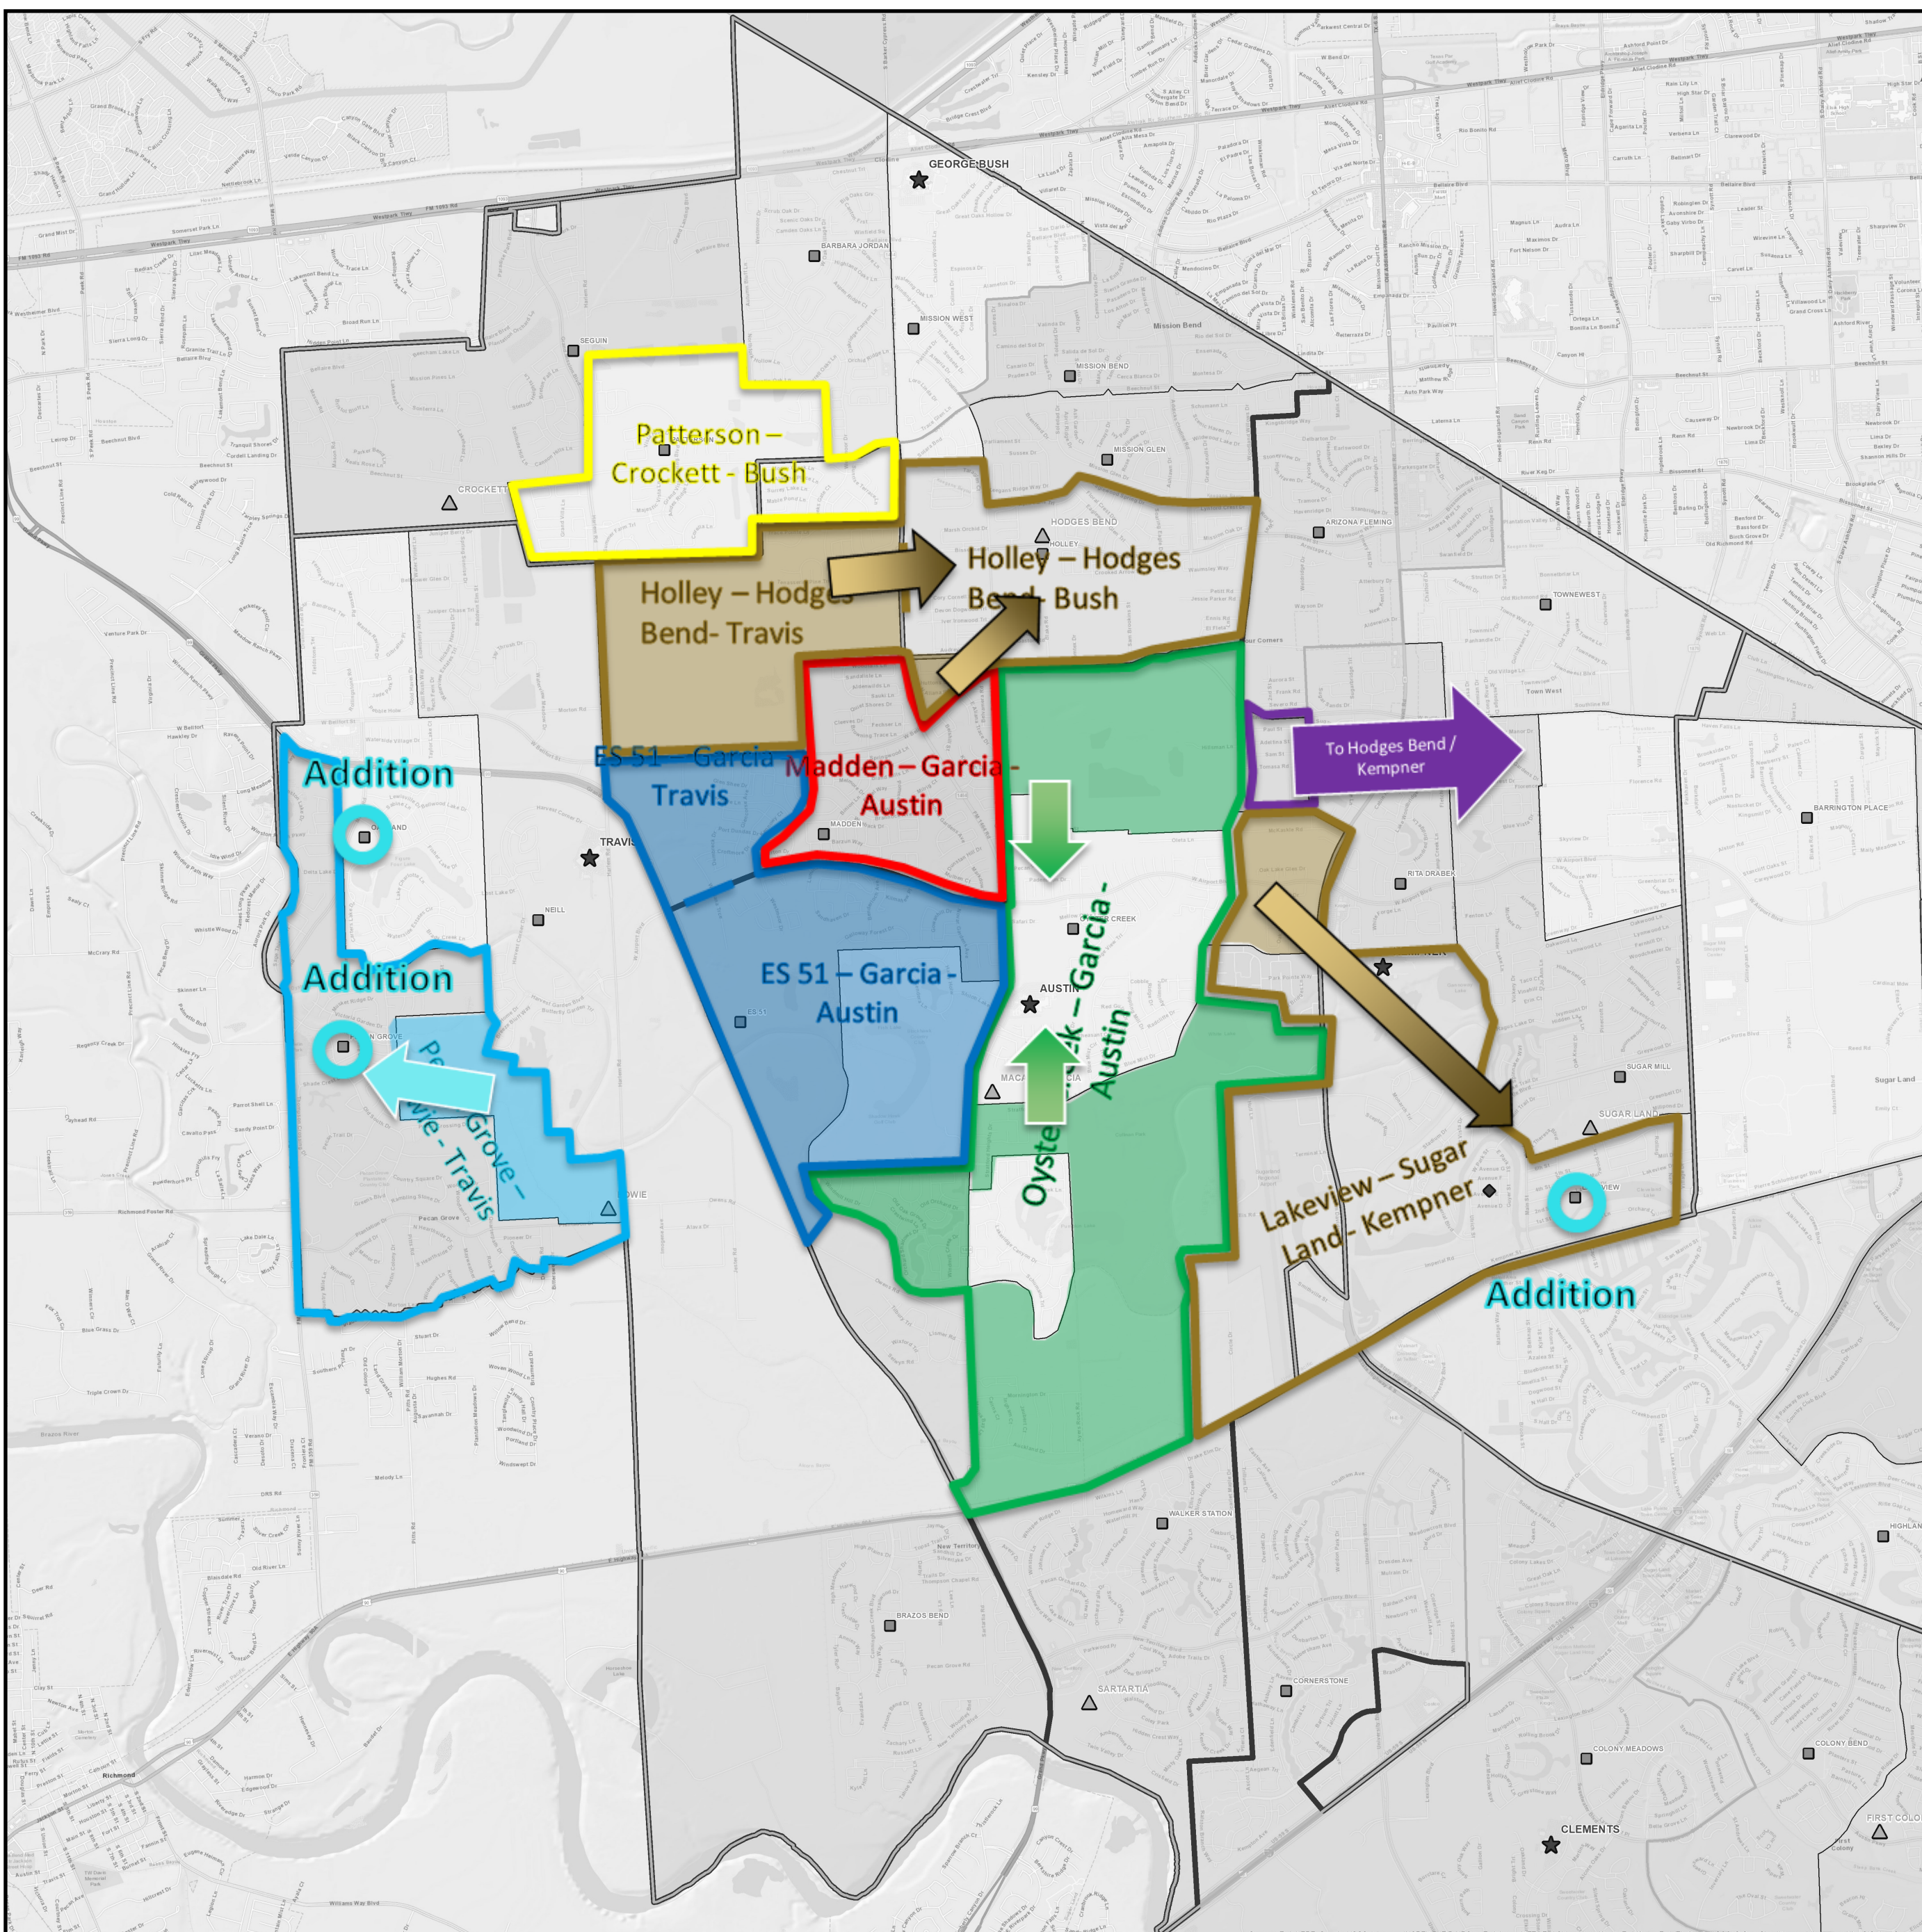

Current Boundaries

The map below illustrates the current boundaries for the northwest area of the district. The background shades of color denote the current elementary boundaries. The thick purple lines outline the high school boundaries. The medium orange lines outline the current middle school boundaries.

Proposed Changes

The map below illustrates the proposed changes to the elementary boundaries as well as any changes to feeder patterns. The proposed boundaries are outlined in bold colors and the areas that change elementary schools are highlighted in transparent shares the correspond to the proposed school.

Resulting Enrollment and Utilization

The tables below illustrate the resulting enrollment, utilization, and percent of economically disadvantaged students relative to this option. Utilization values are color coded to show utilizations over 100% of design capacity in pink or red, and utilizations under 80% in blue. Design capacities reflect the total capacity once all additions are complete. Capacities shaded in dark blue are currently funded, and capacities in light blue will require additions needing funding in a future bond program (unfunded additions show completion in the 2023-24 school year as a place-holder).

	Design Capacity	Current	Projected Enrollment										Projected Utilization										Option Disadvantaged
