

Making Your SMARTBoard Work in Extended Desktop

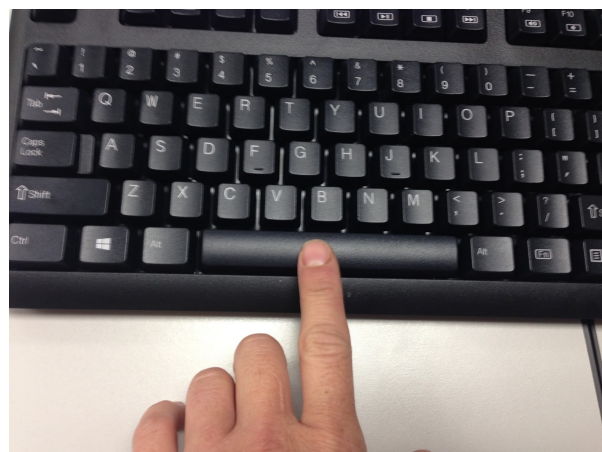

While your laptop is in extended mode, push the orientation buttons on your SMARTBoard.

The orientation will show up on your monitor. That's ok!

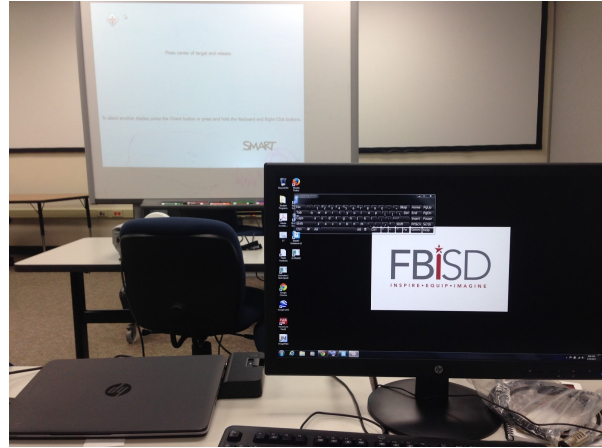

Push the SPACE Bar on your keyboard. It will switch the orientation to the extended desktop on your SMARTBoard.

Making Your SMARTBoard Work in Extended Desktop

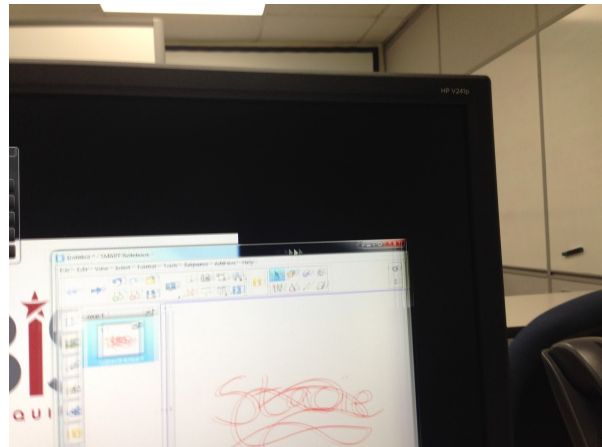

This is what it will look like. Note the monitor shows your desktop while the SMARTBoard in the background shows the orientation.

Go ahead and orient your SMARTBoard by pushing the center of the red plus signs. There are usually 9 total.

Drag your file or web browser over to the extended desktop (which is your SMARTBoard).

Making Your SMARTBoard Work in Extended Desktop

As you drag, you'll see it show up on the SMARTBoard as shown in this picture.

Your SMARTBoard now functions in extended desktop.
