

## RFID ADVISORY FOR CUSTOMERS WITH IMPLANTABLE PACEMAKERS

For the purpose of safety, ScholarChip Card LLC is issuing the following safety advisory:

The ScholarChip Smart ID Card product consists of Low frequency range (125-1345 kHz) and High Frequency range (13.56 MHz). The LF range is used by staff for access control; and the HF is used by students for entry and identification purposes. LF and HF are used in a dual role for some cards. In this case, please use the LF Safe Read Range listed below.

ScholarChip is issuing the following guidelines for safe operation of our cards by users with implantable pacemakers:

Card Type	LF (125-134 kHz - Staff)	HF (13.56 MHz - Student)
Safe Read Range	<b>25 inches*</b>	<b>10 Inches*</b>
* Distance of PM from Reader		

*The above Safe Read Ranges are based on studies from the U.S. Food and Drug Administration and Boston Scientific.*
