### Grading Period 1 Unit 1: World of Work

Estimated Date Range: 8/10/22-10/7/22

**Unit Overview:**

Students will focus on college and career preparedness and discover how to become a viable job candidate in an increasingly globalized job market. The topic of interculturality will be highlighted to demonstrate how in depth cultural knowledge can aid in one's career goals given a world-wide job market. To develop this concept students will continue building cultural comparisons that began in each of the previous units. Moving forward, students will look at their immediate and long-term goals for their future, considering what they learn from interest inventories and their perceptions of personal strengths. They will then consider career preparation opportunities that are available around the world, paying particular attention to those careers that will be needed as they finish their education. Students will discover a career of interest to them and will determine the type of education and experience required by that career and will consider how language skills enhance their marketability in that field. Finally, students will explore working conditions around the world paying close attention to employment issues.

**At home connections:**

- Encourage students to explore Universities in other countries, not necessarily to attend them, but to see similarities and differences with our system here.

**Grading Period 2**  
**Unit 2: We All Need a Home**  
Estimated Date Range: 10/11/22-12/16/22

**Unit Overview:**

In this unit, students will build upon what they learned about describing a house in level II and describe different types of housing and shelter around the world. They will study the evolution of housing since its beginning and how housing innovations have made living easier for humans. They will also consider housing problems in the native and target cultures, discussing creative solutions to these problems and how international organizations help people in need. This will prepare them for level IV AP in that it is a direct correlation with the sub-theme of housing and global challenges that students encounter on the AP test.

**At home connections:**

- Encourage students to label the rooms and furnishings in the house in the target language.

**Grading Period 3**

**Unit 3: Food and Hunger**

Estimated Date Range: 1/5/23-2/16/23

**Unit Overview:**

In this unit, students will learn about the role that food plays in all cultures. They will consider the impact of food on various aspects of their lives and explain the connection between food and culture. They will also compare their own eating habits with those of people in other places and discuss the historic factors that have influenced the foods people eat. Finally, they will explore the worldwide issue of hunger and propose solutions.

This is the third time students will be exposed to real world issues, having done the same with employment and housing problems in the past units. This will make it easier for them to work in this unit and will prepare them further to continue with those coming ahead. This is a multi-sided effort to create global citizens aware of the situations around them.

**At home connections:**

- Encourage students to look for recipes in the target language, and to follow people on social media who feature typical dishes from the target culture(s).

**Unit 4: Exploring the Environment**

Estimated Date Range Grading Period 3: 2/21/23-3/10/23

Estimated Date Range Grading Period 4: 3/20/23-4/6/23

**Unit Overview:**

We live in a world that is constantly changing in many ways. In this unit, students will investigate their role in their physical world in terms of natural disasters, related events and weighty issues such as biodiversity, energy, pollution and innovation in our systems that will address these challenges in the future. As a part of this unit, students will discover how they believe these issues may affect their future, and the role they can play in these choices.

Many skills acquired during previous units will be used here. They will continue to extract meaning from authentic videos, articles and infographics, so they can get language input on the topic. Of special importance are discussing and debating skills that will allow them to have meaningful contributions to conversation and debate tables about the current issues surrounding the environment.

**At home connections:**

- Add ideas for how parents can support learning for this unit

**Unit 5: The Evolution of Technology**

Estimated Date Range: 4/11/23-5/25/23

**Unit Overview:**

Technology is an essential part of our reality in the 21st century, and students will have the opportunity to build on the knowledge of modern technology that they gained in the housing and environmental units. In this unit students will explore how technology has been a part of the human story throughout history. They will discuss the importance of technological inventions and their impact on society, as well as the influence that social media has on the culture of the 21st century. Students will also predict the technological advancements we will see in the future. They will compare technology use both here and in the target culture, and they will explore the affect the rise in technology has had on our written language.

**At home connections:**

- Encourage students to change the language in their devices to the target language.

**Glossary of Curriculum Components**

**Overview**— The content in this document provides an overview of the pacing and concepts covered in a subject for the year.

**TEKS** – Texas Essential Knowledge and Skills (TEKS) are the state standards for what students should know and be able to do.

**Unit Overview** – The unit overview provides a brief description of the concepts covered in each unit.

**Concept** – A subtopic of the main topic of the unit.

**Success Criteria**—a description of what it looks like to be successful in this concept.

**Parent Resources**

The following resources provide parents with ideas to support students' understanding. For sites that are password protected, your child will receive log-in information through their campus.

Resource	How it supports parent and students
Mosaik 3	This is the French textbook. While our curriculum does not align to the textbook, it can be used as a resource for students who might want/need additional practice.
This is Language	This is an online platform that has videos of native speakers talking about a variety of topics, many of which are aligned to our curriculum topics.
<a href="#">Duolingo</a>	This site provides students with extra practice in a variety of languages. It is not aligned with the curriculum, but could be a great way to reinforce the basics.
<a href="#">Multilingual Books</a>	This site has links to foreign newspapers and magazines. Reading in the target language is one of the best ways to increase proficiency with the language.

**Instructional Model**

The structures, guidelines or model in which students engage in a particular content that ensures understanding of that content.

The World Language Instructional Model has two key components: the core practices and the lesson cycle. The six core practices reflect current best practice in language teaching, as well as the expectations from our state and national standards. While teachers will not necessarily accomplish all six every day, they should incorporate them all into their lessons on a regular basis. The lesson cycle is where all of the core practices come together in a cohesive manner. The teacher begins by framing the lesson, either drawing on students’ prior knowledge, or priming the pump for what is to come. During Language Experience, the focus is on comprehensible input, as it is through input that language proficiency is achieved. During Structured Communicative Practice, students get to engage with the language through structured opportunities for output. This is when they and the teacher can see if they have been able to internalize the new language from the input phase. Finally, students will reflect and assess their understanding.
