The standards below are color coded to the MAP categories listed below. In addition, the number in parentheses represents the frequency the standard has been tested on STAAR/EOC since 2017.

**Number and Algebraic Methods** 

**Describe & Graph Linear Equations & Inequalities** 

Write and Solve Linear Functions, Equations, and Inequalities

Quadratic and Exponential Functions and Equations

# Algebra 1

# Scope and Sequence 2025-2026

Mathematical Process Standards: The student uses mathematical processes to acquire and demonstrate mathematical understanding. The student is expected to:

A.1A Apply mathematics to problems arising in everyday life, society, and the workplace

A.1B Use a problem-solving model that incorporates analyzing given information, formulating a plan or strategy, determining a solution, justifying the solution, and evaluating the problem-solving process and the reasonableness of the solution

A.1C Select tools, including real objects, manipulatives, paper and pencil, and technology as appropriate, and techniques, including mental math, estimation, and number sense as appropriate, to solve problems

A.1D Communicate mathematical ideas, reasoning, and their implications using multiple representations, including symbols, diagrams, graphs, and language as appropriate

A.1E Create and use representations to organize, record, and communicate mathematical ideas

A.1F Analyze mathematical relationships to connect and communicate mathematical ideas

A.1G Display, explain, and justify mathematical ideas and arguments using precise mathematical language in written or oral communication

# **Grading Period 1**

### **Unit 1: Solving Linear Equations and Inequalities**

Estimated Date Range: Aug. 12 – Aug. 29 (14 total school days) Instructional & Re-engagement Days in Unit: 13

### Assessments

# Establishing a Positive Mathematics Community A.1A Apply mathematics to problems arising in everyday life, society, and the workplace A.1B Use a problem-solving model that incorporates analyzing given information, formulating a plan or strategy, determining a solution, justifying the solution, and evaluating the problem-solving process and the reasonableness of the solution A.1C Select tools, including real objects, manipulatives, paper and pencil, and technology as appropriate, and techniques, including mental math, estimation, and sense as appropriate, to solve problems A.1D Communicate mathematical ideas, reasoning, and their implications using multiple representations,

including symbols, diagrams, graphs, and language as appropriate

Concept #1: Solving Equations and Inequalities Suggested Days: 10  CFA A.5A (Aug. 25 – Aug. 29)	A.1F Ana A.1G Dis written of Priority S A.5A (14 property Importan A.5B (1)	ate and use representations to organize, record, and onlyze mathematical relationships to connect and commonly, explain, and justify mathematical ideas and argument or oral communication  Standards  Stolve linear equations in one variable, including the particular included in the standards  Standards  Solve linear inequalities in one variable, including those is necessary and for which variables are included on the particular included on the standards.	nunicate mathematical ideas ments using precise mathematical language in  ose for which the application of the distributive both sides.  e for which the application of the distributive						
property is necessary and for which variables are included on both sides  A.12E (1) solve mathematic and scientific formulas, and other literal equations, for a specified variable  Unit 2: Graphing and Writing Linear Functions (Continues in Grading Period 2)  Estimated Date Range: Sept. 2 – Oct.24 (32 total school days)  Instructional & Re-engagement Days in Unit: 28 days (24 days in GP1 and 4 days in GP2)									
		Assessments							
STATE/NATIONAL ASSESSMENT	S	DISTRICT ASSESSMENTS	COMMON FORMATIVE ASSESSMENTS						
N/A	N/A NWEA MAP BOY (9/9 – 9/11) 3 days (CFAs) Unit 2, A.3C, A.2A, A.2C (1 day) Testing Window Oct. 6 – Oct. 24								
Concepts within the Unit		TEKS							
Concept #1: Intro to Functions (Determining Functions and Arithmetic Sequences) Suggested Days: 4	Important Standards:  A.12A (4) decide whether relations represented verbally, tabularly, graphically, and symbolically define a function A.12C (2) identify terms of arithmetic and geometric sequences when the sequences are given in function form using recursive processes  A.12D (3) write a formula for the nth term of arithmetic and geometric sequences, given the value of several of their terms  A.12B (7) evaluate functions, expressed in function notation, given one or more elements in their domains								

Concept #2: Rate of Change and Slope **Priority Standard** Suggested Days: 6 A.3C (18) graph linear functions on the coordinate plane and identify key features, including x-intercept, yintercept, zeros, and slope, in mathematical and real-world problems A.3B (17) calculate the rate of change of a linear function represented tabularly, graphically, or algebraically in context of mathematical and real-world problems Important Standards A.3A (6) determine the slope of a line given a table of values, a graph, two points on the line, and an equation written in various forms, including y = mx + b, Ax + By = C, and  $y - y_1 = m(x - x_1)$ Concept #3: Graphing Linear Functions **Priority Standards** Suggested Days: 7 A.3C (18) graph linear functions on the coordinate plane and identify key features, including x-intercept, yintercept, zeros, and slope, in mathematical and real-world problems A.2A (13) Determine the domain and range of a linear function in mathematical problems; determine reasonable domain and range values for real-world situations, both continuous and discrete; and represent domain and range using inequalities Important Standards A.3E (6) determine the effects on the graph of the parent function f(x) = x when f(x) is replaced by af(x), f(x) + d, f(x-c), f(bx) for specific values of a, b, c, and d. Concept #4: Writing Linear Functions **Priority Standards** Suggested Days: 6 A.2C (14) write linear equations in two variables given a table of values, a graph, and a verbal description CFA A.2A, A.2C, A.3C **Important Standards** A.2B (4) write linear equations in two variables in various forms, including y = mx + b, Ax + By = C, and  $y - y_1 = m(x - b)$ (Oct. 6 - Oct. 24) $x_1$ ), given one point and the slope and given two points A.2D (6) write and solve equations involving direct variation A.2E (4) write the equation of a line that contains a given point and is parallel to a given line. A.2F (2) write the equation of a line that contains a given point and is perpendicular to a given line A.2G (5) write an equation of a line that is parallel or perpendicular to the X or Y axis and determine whether the slope of the line is zero or undefined Concept #5: Linear Regression **Important Standards** A.4C (4) write, with and without technology, linear functions that provide a reasonable fit to data to estimate Suggested Days: 2

solutions and make predictions for real-world problems

(Dec. 2 - Dec. 12)

A.4A (3) calculate, using technology, the correlation coefficient between two quantitative variables and interpret this quantity as a measure of the strength of the linear association A.4B Compare and contrast association and causation in real-world problems **Grading Period 2 Unit 2: Graphing and Writing Linear Functions (Continued)** Estimated Date Range: Sept. 2 – Oct.24 (32 total school days) Instructional & Re-engagement Days in Unit: 28 days (24 days in GP1 and 4 days in GP2) See grading period 1 for details **Unit 3: Systems of Linear Equations and Inequalities** Estimated Date Range: Oct. 27 – Dec. 19 (35 total school days) Instructional & Re-engagement Days in Unit: 30 days Assessments STATE/NATIONAL ASSESSMENTS DISTRICT ASSESSMENTS **COMMON FORMATIVE Semester Exams** N/A N/A **ASSESSMENTS** (4 days) Testing Window (12/16 – 12/19) Unit 3, A.2I, A.5C, A.3D (1 day) Testing Window (12/2 - 12/12)**Concepts within the Unit TFKS** Concept #1: Representing Systems of **Priority Standards Equations** A.21 (13) write systems of two linear equations given a table of values, a graph, and a verbal description Suggested Days: 5 Important Standards A.3F (5) graph systems of two linear equations in two variables on the coordinate plane and determine the solution if they exist A.3G (2) estimate graphically the solutions to systems of two linear equations with two variables Concept #2: Solving Systems of Equations **Priority Standards** Suggested Days: 8 A.5C (13) Solve systems of two linear equations with two variables for mathematical and real-world problems Concept #3: Linear Inequalities in 2 **Priority Standards** A.3D (14) Graph the solution set of linear inequalities in two variables on the coordinate plane Variables Suggested Days: 8 Important Standards A.2H (5) write linear inequalities in two variables given a table of values, a graph, and a verbal description CFA A.2I. A.5C. & A.3D

Concept #4: Systems of Linear Inequalities. Suggested Days: 4	-	t <u>Standards</u> raph the solution set of systems of two linear inequaliti	ies in two variables on the coordinate plane							
		Grading Period 3
