

CONNECTING TO YOUR LENDING LIBRARY INTERNET HOTSPOT

If you have multiple students in your household, they may use the hotspot at the same time

1. There are two hotspot models available. While they look different, they function the same.

2. Press and hold the Power/Menu button for three seconds to turn the hotspot on or off.

It is normal for the device to take one or two minutes to connect with the cellular 4G LTE network.

4. You may now pair laptops/tablets with the hotspot for internet access.

5. This hotspot is intended for student participation in online instruction and features **unlimited data per month** and routes all internet traffic through the FBISD Web Filter to ensure a safe and secure connection for our students.

3. Tap the Power/Menu Button to view the hotspot network name and password.

Press twice for the Wi-Fi name

Press three times for the Password
