21st Century Skills Concepts

Description

What is meant by "21st century skills?" How do they relate to what I should be teaching in my classroom? These are just some of the questions that you might be asking when you hear the term "21st century skills." In this series of tutorials, we will present what we mean by the terminology and how it relates to the models and frameworks that have been developed by other organizations. After viewing each of the tutorials, we hope you will be able to answer:

- What are the common themes and concepts that tie all the models and frameworks together?
- What is meant by "21st century skills" and why is knowing about them important?
- What does the concept or skill look like in practice?
- How can I make it work in my classroom?

In addition, you'll be introduced to the tools and resources available on this site for furthering your own professional development and transforming your own classroom.

Mrs. VanHoosier to Computer Technology

I have an interview for a K-5 Technology Teacher in my school district. It's a brand new position, so I have a feeling they really aren't sure what they are looking for! Any suggestions or tips on interviewing? Any buzzwords that I should be sure to mention?
So far I'm thinking big on these areas for grades 3-5: specific teaching on how to research on the internet (digital literacy), how to manipulate keywords when conducting a search, internet safety, the use of databases, typing, Microsoft office skills, proper saving protocol, etc.
And for grades...
