

How to Access the Student Info App

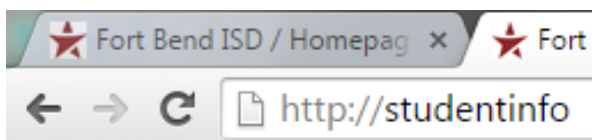

The Student Info App is available to assist teachers and other school staff with locating student information, such as network passwords, contact information, ID numbers, and more.

Who has access to this information?

Teachers have the ability to see students listed on their class roster(s). Specialists, facilitators, and other school personnel will need to request information from the student's teacher(s) of record. Campus administrators and librarians have access to information for all students on their campus. Please enter a case in CRM if your access level does not appear to be accurate.

How do I access a student's information?

Step 1: Open an Internet Browser. In the address bar, type <http://studentinfo>. Press Enter.

Step 2: Locate the student whose information you need to access. Click on the student's ID number to access his/her information.

How do I view a student's network password?

Click on the blue box to view the student's password.
