

	Pandemic Management Plan Indicator Descriptions			
	Indicator	Data Source	What it is	Why it is important/What it tell us
District Indicators (Internal Data)	# of new COVID Positive Cases over a 14-day period	FBISD Internal Data: <ul style="list-style-type: none"> Student COVID Tracking Data Report <i>(via self-reporting)</i> Employee COVID Tracking Data Report <i>(via self-reporting)</i> 	This indicator provides data within the last 14 days regarding the number of NEW employee (online and face-to-face) and NEW student (online and face-to-face) cases of COVID-19 as self-reported by the employees and students.	This information provides the District and community with timely information regarding the number of positive cases leading to student and staff quarantine or isolation which could impact student and staff attendance and may signal necessary next steps for District and/or campus operations.
	Disruption of District operations due to shortage of personnel	FBISD Internal Data: <ul style="list-style-type: none"> Kronos Absence Report PS Absence Report ReadySub Absence Report 	This indicator provides data within the last 14 days regarding employee absences for employees whose absence would disrupt the instruction of students if they were absent for the short term. For example, teachers with significant absences would be disruptive to students' instruction.	This information is important as it provides data to the District leadership about whether there is sufficient staff to perform essential District operations related to educating children.
	Spread in Feeder Pattern with confirmed (positive) cases	FBISD Internal Data: <ul style="list-style-type: none"> Student COVID Tracking Data <i>(via self-reporting)</i> Employee COVID Tracking Data <i>(via self-reporting)</i> 	This indicator provides data within the last 14 days regarding number of employee and student positive cases within schools in each feeder pattern (link to feeder pattern).	This information is important as it provides data indicating the status of a geographic region regarding the number of employee and student positive cases in a geographic region of the District.
	Utilization of Leave Benefits (FFCRA)	FBISD Internal Data: <ul style="list-style-type: none"> Leaves Report PeopleSoft 	This indicator provides data within the last 14 days regarding employee utilization of leaves and provides a comparison of non-FFCRA leaves to FFCRA leaves as well as a comparison of leaves for the prior year in the same month.	This information is important as it provides data to the District leadership about whether there is sufficient staff to perform essential District operations related to educating children.
Campus/District Facilities Indicators (Internal Data)	Change in the # of New COVID Positive Cases over a 14-day period	FBISD Internal Data: <ul style="list-style-type: none"> Student COVID Tracking Data Report Employee COVID Tracking Data Report 	This indicator provides data regarding the change in the number of new positive cases of COVID-19 over the last 14 days compared to the previous 14 days for the number of employee and student cases of COVID-19.	This information provides the District and community with timely information regarding the number of positive cases leading to student and staff quarantine or isolation which could impact student and staff attendance and may signal necessary next steps for District and/or campus operations.
	% of Teachers and Students absent	FBISD Internal Data: <ul style="list-style-type: none"> Skyward Student Absence Report ReadySub Absence Report 	This indicator provides data within the last 14 days regarding employee and student absences and provides a comparison of teacher and student absences for the prior year in the same month.	This information is important as it provides data to the District leadership about student attendance and about availability of staff to perform essential District operations related to educating children. The comparison to the prior year provides a baseline.
	Disruption of District operations due to shortage of personnel.	FBISD Internal Data: <ul style="list-style-type: none"> Kronos Absence Report PS Absence Report ReadySub Absence Report Disruptive/Non Disruptive positions report 	This indicator provides data within the last 14 days regarding employee absences reported in the past 14-days for employees whose absence would disrupt the instruction of students if they were absent for the short term. For example, teachers being absent would be disruptive to students' instruction if they were absent for the short term.	This information is important as it provides data to the District leadership about whether there is sufficient staff to perform essential district operations related to educating children.
	% of COVID Symptoms	FBISD Internal Data: <ul style="list-style-type: none"> LiveWell - Employee Symptom Report <i>(via self-reporting)</i> LiveWell - Employee count completed symptom checker report Skyward Student symptom report <i>(via self-reporting)</i> 	<p>The LiveWell App (staff) is a self-reporting tool for employees and is required to be completed each day both remotely and onsite.</p> <p>The District COVID-19 Team manages student data as reported through Skyward and staff COVID-19 related cases as reported through the LiveWell App.</p>	<p>The LiveWell App information helps the District to have an early indicator regarding the health and wellbeing of staff as it relates to the COVID-19 pandemic. Further, it is used in addition to each location's Wellness Monitors to ensure the safety of staff who enter District facilities each day.</p> <p>This team receives, logs, investigates, manages, processes, and oversees all COVID-19 cases across the District's more than 78,000 students and 13,000 staff. The District COVID-19 Team supports and coordinates with Campus COVID-19 Teams to guide impacted students and staff through the centralized contact tracing process.</p>
