

Figure 5-5. Present Arms

5-8. *Orders Arms* from *Present Arms* is a three-count movement. The command is **Order, ARMS**. On the command of execution **ARMS**, twist the carbine back to the *Port Arms* position. Counts two and three are executed the same as from *Port Arms*.

## INSPECTION ARMS

5-9. To execute *Inspection Arms* (see figure 5-6 on page 5-8), use the following procedures:

- *Inspection Arms* from *Order Arms* is a seven-count movement. The command is **Inspection, ARMS**.
  - On the command of execution **ARMS**, execute *Port Arms* in the first two counts.
  - On count three, move the left hand from the handguard and grasp the pistol grip, thumb over the lower portion of the bolt catch.
  - On count four, release the grasp of the right hand, unlock the charging handle with the thumb, and sharply pull the charging handle to the rear with the thumb and forefinger. At the same time, apply pressure on the lower portion of the bolt catch, locking the bolt to the rear.
  - On count five, without changing the grasp of the right hand, sharply push the charging handle forward until it is locked into position; then regrip the carbine with the right hand at the small of the stock.
  - On count six, remove the left hand, twist the carbine with the right hand so that the ejection port is skyward, regrip the handguard with the left hand just forward of the slip ring, and visually inspect the receiver through the ejection port.
